PUBLICATIONS with links to PDF files

Back to My research

My publications are listed chronologically on a separate page: [chronological list](#)

I have scanned in or downloaded these publications because although referred to in the literature they are often not available in electronic form from libraries.

Publications are listed below as **Research Papers** and **Reviews**

They are all available as downloadable pdf files from this site.

If you download for printing this is equivalent to me sending you a requested reprint.

I would appreciate if you tell me by sending an email to c.anthony@tsoton.ac.uk

NOTE: If a simple click on 'PDF' link does not work then Right clk and open in separate window.

Research Papers [listed under topic]

TOP

Methanol dehydrogenase	Modifier protein of methanol dehyd.	Cytochromes and electron transport	X-Ray Structures of MDH and cytochromes	Blue copper proteins in methylotrophs
Metabolism	Miscellaneous methylotrophs	Methylotroph genetics	Nitrogen fixation & N tpt in Aspergillus	Alcohol dehydrogenase & glucose dehydrogenase

Methanol dehydrogenase [some are listed under X-ray structures, and cytochrome c]
